

## QUINTO – extravagance for SUVs

The successful model from RIAL now also available for numerous SUVs

Bad Dürkheim, 05.05.2015.

What could be more wonderful in spring than treating your SUV to a fresh look in the form of new wheels? With the successful QUINTO model, RIAL has just the right thing for extravagant tastes for numerous current SUV models, for example the new BMW X4. In the dimensions 9.0 x 19 and 9.5 x 20 inch, the stylish alloy wheel cuts a fine figure both off-road and in town.

A thrilling combination of refractive edges and surfaces distinguishes the five spokes and makes the wheel a dynamic head-turner. The raised design on the bed of the rim that gives the wheel a certain extravagant touch is totally unique.

Changing to the new wheel from RIAL is really easy and uncomplicated for Range Rover owners. The QUINTO can be unconditionally mounted for the series tyres with the corresponding type approval in the dimensions 9.0 x 19 inch and 9.5 x 20 inch. For all Range Rover drivers this means: there is no need for individual approval by TÜV or any addition to the licence certificate part I (vehicle registration certificate). Toyota Landcruiser drivers can also be really happy: with a 5/150 hole pattern the QUINTO is one of the few alternatives to series wheels available.

The new QUINTO is available in front polished diamond black and polar silver colour designs. In the 19 inch size the wheel is designed for loads up to 1,000 kilograms per wheel and in 20 inch for 1,030 kilograms maximum.

Like all the current RIAL alloy wheels, QUNITO is also compatible with tyre pressure monitoring systems (TPMS). Besides the original sensors, many accessory sensors from manufacturers, such as HUF/BERU, Alligator, VDO and Schrader, can also be used. A TPMS is mandatory for all newly registered vehicles since 1 November 2014. The TPMS valve functions fully in vehicles that are equipped with it.

The QUNITO alloy wheel is supplied with type approval certification.

*Image 1: RIAL QUNITO in diamond-black front polished and polar silver with 5-hole design is available for the current SUV in the dimensions 9.0 x 19 inch and 9.5 x 20 inch.*

*Image 2: Special cars, the BMW X4 here, deserve special wheels like the QUNITO.*
